The Investor View

Hammersmith & Shepherd's Bush

Q4 2015

Douglas
& Gordon

Good to know.

Introduction

Anyone who owns a property in London is a property investor. Our lives and plans often depend on the performance of what is likely to be the largest asset we own. So perhaps it will be helpful to take more of an investor's view of the market.

To produce this report we worked closely with D&G Asset Management, a company we co-founded in 2005. They deploy money into London residential property all the time, so they are constantly analysing different areas and the assets within those areas, seeking to maximise returns.

As well as publicly available sources, we have used the proprietary data that we have been capturing since 1996 to help us make decisions and provide advice and guidance to our clients.

D&GAM has helped us focus on the data that counts and we think the results make fascinating reading.

If you would like to learn more about the Hammersmith & Shepherd's Bush area, please do get in touch with our office on Glenthorne Road. Contact details can be found on the back page.

Property Values

Q3 saw a price sensitive market in Hammersmith & Shepherd's Bush

In Q3 2015, capital values in Hammersmith & Shepherd's Bush remained unchanged. This is the third quarter in a row that has seen no movement in prices. The picture was slightly different across other Douglas & Gordon Emerging Prime offices, where prices fell on average by 0.56%.

Q3 2015 in more detail

- After the ups and downs of the past 18 months, Q3 2015 saw the return of a more normal property market in Emerging Prime.
- Sensibly priced, well-located and well-presented properties, requiring little or no work, are achieving a good level of interest. Poorly located properties in bad condition are taking longer to sell.
- In the last quarter, for both the flats and house market, sellers have become more aggressive on their asking price. The feeling is that unless properties have a premium finish, these expectations will not be met by buyers.
- As the chart indicates, in many cases, prices are broadly at the levels seen twelve months ago when the market also first encountered resistance.
- The top end of the market (£2m+) has slowed due to the increases in SDLT rates. As a result, many owners are investing money extending their properties rather than bearing the high costs of moving.

Background factors in play

- Homeowners across our Emerging Prime offices have large equity positions and are therefore discretionary sellers.
- Land registry data shows that between H1 and H2 2014, sales volumes in Hammersmith & Shepherd's Bush declined: flats -35%, semi-detached houses -27% and terraced houses -25%.

Hammersmith & Shepherd's Bush Nominal Property Values			
	Q3 2015	YTD	Since Q2 2014
1 Bed Flats	0.00% →	0.00% →	1.01% ↗
2 Bed Flats	0.00% →	0.00% →	3.23% ↗
3 Bed Houses	0.00% →	0.00% →	6.00% ↗
4 Bed Houses	0.00% →	0.00% →	-1.35% ↘

Source: D&G proprietary data

- Nervous buyers concerned about any pockets of weakness seen over the last 18 months should note these volume numbers. From a market perspective, low volume sell-offs are a characteristic of "Prime" markets where demand is always out there and soon returns after a short period of adjustment.
- Our research suggests that in Q3 2015 buyers were price sensitive as borrowers were wrongly guided to expect higher interest rates. See page 4 for our outlook on monetary policy.

In Q3 2015 buyers were price sensitive

Outlook

- Sellers should remain realistic and ignore headlines about UK national house price rises as they do not apply to London. The bull market in Hammersmith & Shepherd's Bush ended in April 2014.

How an investor looks at the market

Residential property investors use two key measures: the capital value of the property and its net rental yield.

You can make money from an increase in capital value and earn additional income by renting out a property you own. The net yield is the annual rent, less expenses, divided by the property's capital value.

Both are important and are influenced by many factors including: supply of new properties, infrastructure projects, demographics of the area,

the economy (in particular, interest and tax rates) and the wider geopolitical picture.

The interplay of these factors is what determines investment returns and what makes property investment decisions so interesting. We hope this report provides some help as you assess your options.

In Q3 rents were strong but clouds were gathering over the Hammersmith & Shepherd's Bush house market

Rental Growth & Yield

In Q3 2015, average rental values across D&G Land rose by 0.3%. Prime offices averaged a growth of 0.9% and Emerging Prime offices produced a very small increase of 0.03%. Against this background rental values declined in Hammersmith & Shepherd's Bush by 1%. The breakdown of the numbers paints a complicated picture.

Corporate budgets are tightening

In our last report we wrote that we were optimistic that Hammersmith & Shepherd's Bush would have a good summer house market. We can report that as Q3 2015 unfolded, prices were firm.

Over the past year, we have written about the trend of corporate tenants moving out of Prime London to look for better value in lower-priced areas, such as Hammersmith & Shepherd's Bush.

We are now seeing further tightening of the corporate belt which some of our other Emerging Prime offices have started to experience. This could begin to affect Hammersmith & Shepherd's Bush in the near future. Investors need to think ahead.

Fewer corporates means landlords will have to invest in upgrading their properties to appeal to the decreasing pool of prospective tenants, and/or consider the growing professional sharers market.

Investors need to think ahead

Those house owners who have been averse to the sharers market will be interested to know that the demographics are shifting. Our internal data shows that 50% of our tenants in Hammersmith & Shepherd's Bush are over 30 - the new so called "generation rent": people who aspire to buy and want to maintain excellent credit records, but have to remain in rental accommodation for longer.

On a brighter note for investors, rental values in the Hammersmith & Shepherd's Bush flats market were firm in Q3, as indeed they were across D&G Land. One explanation for this is that the sales market has not, as yet, taken off and people are staying put in

Hammersmith & Shepherd's Bush Nominal Rental Growth			
	Q3 2015	YTD	Since Q2 2014
1 Bed Flats	0.00% →	1.47% ↗	6.15% ↗
2 Bed Flats	0.00% →	2.06% ↗	2.06% ↗
3 Bed Houses	0.00% →	3.95% ↗	5.33% ↗
4 Bed Houses	5.53% ↗	10.53% ↗	10.53% ↗

rented accommodation. The other reason, and a further consequence of corporate belt tightening, is that companies are relocating a greater proportion of single employees.

Outlook

In this low growth and low inflationary environment, we remain cautious on rental growth.

In Q3 the global economic backdrop to the London property market was challenging (see chart). Some commentators believe that the recent turmoil in emerging market economies is the third stage of the global financial crisis that began in 2008. The implications of this are:

- Central banks across the world remain worried by no inflation:
 - In the USA: 2014 - 15 US median household income fell
 - In the Eurozone: Inflation turned negative in September 2015 (notwithstanding E 500 billion + of asset purchases by the ECB this year)
 - In Japan: The third quarter looks set to contract after the second quarter contracted 1.2% (notwithstanding \$665 billion of asset purchases by BOJ over the last year)
- Capital flight from emerging market economies will pose a major threat to global growth (between 2010 and 2015, China was responsible for 50% of global growth)
- There will also be renewed threats to capital adequacy of US/UK/European major banks.

These global downside pressures will inevitably dampen UK growth, employment and inflation.

A lone voice holding this view has been Andrew Haldane, Chief Economist at The Bank of England.

On 18th September, the day after the FOMC kept US interest rates on hold, he said “In my view the balance of risks to UK growth and to UK inflation at the two year horizon is skewed squarely and significantly to the downside ... there could be a need to loosen rather than

Global economic backdrop to Q3 2015

Recent turmoil in emerging market economies has seen losses across indexes and major commodities during Q3 2015

tighten the monetary reins as a next step to support UK growth and return inflation to target.”*

Since 2009 we have been arguing that the threat of deflation will overhang the global economy for many years and that there was no prospect of interest rate rises for years to come. We have also argued for the last two years that further QE and/or monetary loosening in the UK was likely, when others have been predicting rate rises and higher inflation.

Continuing and stabilising low borrowing rates will lead to a pick up in mortgage approvals and this will have greater effect on some parts of the UK housing market than others.

* Speech to Portadown Chamber of Commerce 18th September 2015

Hammersmith & Shepherd’s Bush key facts & figures

Here are the key facts and figures anyone investing in the property market needs at their fingertips.
