# The Investor View

Gloucester Road  
Q3 2015

**Douglas  
& Gordon**

Good to know.

# Introduction

Anyone who owns a property in London is a property investor. Our lives and plans often depend on the performance of what is likely to be the largest asset we own. So perhaps it will be helpful to take more of an investor's view of the market.

To produce this report we worked closely with D&G Asset Management, a company we co-founded in 2005. They deploy money into London residential property all the time, so they are constantly analysing different areas and the assets within those areas, seeking to maximise returns.

As well as publicly available sources, we have used the proprietary data that we have been capturing since 1996 to help us make decisions and provide advice and guidance to our clients.

D&GAM has helped us focus on the data that counts and we think the results make fascinating reading.

If you would like to learn more about the Gloucester Road area, please do get in touch with our office on Gloucester Road. Contact details can be found on the back page.

## Property Values

Prices have plateaued following the surprising election result.

### Q2 2015 performance

With the exception of smaller flats, capital values in Gloucester Road were unchanged in Q2 2015. This was broadly similar to the picture across many of our Prime offices where prices rose at an average of 0.7%. By contrast, our Emerging Prime offices saw stronger price rises, at an average of 1.81%, fuelled by flats and smaller houses.

### In the context of the last 12 months

- Capital values of flats, particularly those priced under £2m, are slightly higher than December 2014. One bedroom flats are now commanding similar prices to 12 months ago.
- The election result, which lifted the threat of a mansion tax on properties over £2m, has had little impact to date on the Gloucester Road market.
- New Stamp Duty rates (announced in December) have made some vendors deliberate for longer before moving. Buying a £3.5m property now incurs SDLT fees of £333,750 (against £245,000 last year and £35,000 25 years ago).
- In the Gloucester Road market, the result has been a lack of urgency on the part of both buyers and vendors. This might well change in the Autumn.

**The election result has provided all of the ingredients for a strong and stable London housing market.**

### The Election Effect

Immediately after the surprise election result on 7th May we forecast that the outcome would produce all of the ingredients necessary to create a strong and stable London property market.

Whilst post-election prices in some parts of the market are rising, data from the last 6 weeks indicates that in other segments, particularly for higher valued stock, it is too soon to detect any market movement.

### Gloucester Road Nominal Property Values

	Q2 2015	Q1 2015	Since Q2 2014
1 Bed Flats	0.36%	-0.18%	-0.70%
2 Bed Flats	0.00%	-3.52%	-6.50%
3 Bed Houses	0.00%	-2.22%	-2.60%
4 Bed Houses	0.00%	-2.04%	-2.04%

Source: D&G proprietary data

Looking to the future, investors should consider the following:

- One of the new government priorities is to return its stake in Lloyds and RBS to the private sector. This will create a political landscape that will see an increase in lending, with potentially helpful consequences for the housing market.
- The early signs of change are evident in the mortgage market. Data from the Bank of England has shown that 5 year fixed rate mortgages (for 75% LTV) fell below 3% in Q2 2015. The recent upward trend in mortgage approvals, although way below historic levels, is also a positive sign.
- We have consistently argued that any fiscal tightening from the new government will keep base rates low.
- We are hearing that following the election, vendors have hardened their stance towards price reduction. In some instances this is understandable. In general, however, as the market strengthens, vendors looking to move up the property ladder should consider the risk of holding out for an aspirational sale price, whilst the purchase price of their new property increases at an incrementally higher rate.

# How an investor looks at the market

Residential property investors use two key measures: the capital value of the property and its net rental yield.

You can make money from an increase in capital value and earn additional income by renting out a property you own. The net yield is the annual rent, less expenses, divided by the property's capital value.

Both are important and are influenced by many factors including: supply of new properties,

infrastructure projects, demographics of the area, the economy (in particular, interest and tax rates) and the wider geopolitical picture.

The interplay of these factors is what determines investment returns and what makes property investment decisions so interesting. We hope this report provides some help as you assess your options.

## In Q2 2015 Gloucester Road rental values remained unchanged.

## Rental Growth & Yield

### Q2 2015 performance

In Q2 2015 average rents across D&G Land rose by 1.6%. In Emerging Prime rental growth averaged +1.7%. This was higher than in Prime, which saw average growth of 1.5%.

Against this rather buoyant background, our data shows that rental values in the Gloucester Road area remained unchanged in Q2 2015. This follows a very static 12 month period.

The prime rental market, taken as a whole, has shown only small rises in cash terms since before the financial crisis. However, within this statistic, there are some marked local differences. Smaller flats, attractive to the increasingly wealthy visitor and student population, have outperformed.

A significant number of flats in the Gloucester Road area are rented by overseas students studying at Imperial College. This market kicks off in the early summer but is not in full swing until August. We expect prices to be a little firmer then.

**A strengthened sales market might put a ceiling on rental values in the Autumn.**

### Outlook

During the last 12 months in D&G Land, the rental story has been about rental stability during a slow down in the sales market.

As reported in the previous edition of The Investor View, a strengthened sales market will potentially lead to a slow down in rental growth. This may put a ceiling on rents in the Autumn.

### Gloucester Road Nominal Rental Growth

	Q2 2015	Q1 2015	Since Q2 2014
1 Bed Flats	0.00% →	-4.04% ↘	-4.04% ↘
2 Bed Flats	0.00% →	0.00% →	0.00% →

At the start of 2015 Douglas & Gordon initiated a quarterly index, tracking capital values across Emerging Prime areas of London, particularly in relation to Prime London prices.

In the rental sector, the performance of Emerging Prime in relation to Prime tells an interesting story.

Over the last 10 years, rents in Prime have remained relatively static. By contrast, there has been considerable rental growth in Emerging Prime - consequently, the gap between the two markets is narrowing.

This movement is demonstrated in the charts using data from Battersea Park and Clapham.

There are several factors behind this convergence:

- Demographics: There are almost 1m more people working in London than a decade ago. This has generated increased demand in the rental market.
- A changing corporate environment: Budgets have tightened since the financial crisis. This has led to corporate tenants seeking places to rent outside Prime London areas.
- Social Trends: Emerging Prime is becoming more fashionable, particularly with overseas renters.

Prime (Chelsea) rental values for 3 bed houses

Prime (Chelsea) rental values for 1 bed flats

Source: D&G proprietary data

Many investors are waking up to the fact that, with changing demographics, the quality of income streams in Emerging Prime are on par with Prime. Additionally, current yields in Emerging Prime are significantly higher than Prime.

It will be intriguing to see how this unfolds.

## Gloucester Road key facts & figures

Here are the key facts and figures anyone investing in the property market needs at their fingertips.

Nominal Rental Income Growth to Dec 2014			
	2014	5 years	10 years

RPI	1.6%	18%	36%

\*House Price Index

## Gloucester Road 2015 Our view

- Capital values: Strong year ahead for sub £1m, above £1m slow start but picking up in H2 2015
- Rental values to plateau in real terms.
